

BRIDGE ENGINEERING

By
Rangwala

Edition : 16th Revised and Enlarged Edition : 2017 (First Reprint)
ISBN : 9789385039089
Size : 170 mm × 240 mm
Binding : Paperback
Pages : 304 + 16 = 320

₹ 200.00 **BUY**

ABOUT THE BOOK

This book aims at presenting the topics of Bridge Engineering written in a simple manner. The subject-matter is characterized by comprehensive as well as methodical and easy-to-follow style.

Out line of *Sixteenth Revised and Enlarged edition* of this popular and highly acclaimed book of *Bridge Engineering* are as below:

Chapter 1 gives *Introduction* of the subject.

Chapters 2 and 3 of Bridge Foundations, expanded and divided in two separate chapters. **Foundation I: Spread and Pile Foundations and Foundation II: Caissons and Cofferdams.**

Chapter 4 explains *Sub-structures* such as Abutments, Piers, Wing Walls etc.

Chapter 5 gives variety of *Fixed-Span Super-structures* – Various Types of Bridges such as Simple, Cantilever, Arch, Bow-string Girder type, Rigid Frame, Suspension, Cable-stayed bridges.

Chapter 6 consists *Low cost Bridges: Movable-Span Super-structures.*

Chapter 7 consists *Low cost Bridges: Culverts and Causeways.*

Chapter 8 consists *Low cost Bridges: Timber or Temporary Bridges.*

Chapter 9 discusses *Flooring*. It includes Factors, Requirements of Floorings, Types of Floorings and various Flooring Materials etc.

Chapter 11 mention the Broad Outline of *Loading on Bridges.*

Chapter 12 This newly added chapter gives knowledge on *Construction and Erection Methods of Bridge Super-structure.*

Chapter 13 is newly added chapter on *Maintenance of the bridges.*

Chapter 14 give various *Miscellaneous Topics* such as Afflux; Approaches of Bridge; Bridge Architecture, Clearance and Freeboard, Combined Road and Railway Bridges; Double-decker Bridge; Economic Span of Bridge, Grip Length, Handrails, Joints of Bridge; M.F.D. or H.F.L.; River Training Works etc.

In Appendix, *Marvellous Bridges of the world*, which gives technical information, such as India's latest Bandra-Worli Sea Link, Mumbai, India; The Golden Gate Bridge, San Francisco, USA; Tower Bridge, London, UK, Sundial Bridge, California, USA and Zhangjiajie Grand Canyon Glass Bridge, China.

The text-matter has been arranged systematically into Fourteen Chapters assisted by:

- * 224 Self-explanatory and neatly drawn sketches;
- * 12 Illustrative problems;
- * 20 Important useful tables;
- * 251 Typical questions at the end of the chapters.

The book should prove to be extremely useful to the Civil Engineering students preparing for the Degree Examinations of all the Indian Universities, Diploma Examinations conducted by various Boards of Technical Education, Certificate Courses as well as for the A.M.I.E., U.P.S.C., G.A.T.E., I.E.S. and other similar competitive and professional examinations. It should also prove of interest to the practising professionals.

CONTENT

- 1: INTRODUCTION
 - 2: FOUNDATION — 1
SPREAD AND PILE FOUNDATION
 - 3: FOUNDATIONS — 2
CAISSONS AND COFFERDAMS
 - 4: SUB-STRUCTURES
 - 5: FIXED-SPAN SUPER-STRUCTURES
 - 6: LOW COST BRIDGES: MOVABLE-SPAN SUPER-STRUCTURES
 - 7: LOW COST BRIDGES: CULVERTS AND CAUSEWAYS
 - 8: LOW COST BRIDGES: TIMBER OR TEMPORARY BRIDGES
 - 9: FLOORING
 - 10: LOADING ON BRIDGES
 - 11: BEARINGS
 - 12: CONSTRUCTION AND ERECTION METHODS OF BRIDGE SUPER-STRUCTURE
 - 13: MAINTENANCE OF THE BRIDGES
 - 14: MISCELLANEOUS TOPICS
- APPENDIX: SOME MARVELLOUS BRIDGES

Catalogue Checklist

BRIDGE ENGINEERING
DETAILED CONTENTS

Chapter 1: INTRODUCTION

- 1-1. General
 - 1-2. Development of bridges
 - (1) Arch bridges
 - (2) Suspension bridges
 - 1-3. Changing Scenario in Design and Construction of bridges
 - 1-4. Components of a bridge
 - (1) Sub-structure
 - (2) Super-structure
 - (3) Adjoining structures
 - 1-5. Classification of bridges
 - 1-6. Importance of bridges
 - 1-7. Identification of bridges
 - 1-8. Preliminary data to be collected
 - 1-9. Selection of bridge site
 - (1) Connection with roads
 - (2) Freeboard
 - (3) Firm embankments or river banks
 - (4) Foundations
 - (5) Large tributaries
 - (6) Materials and labour
 - (7) Minimum obstruction to waterway
 - (8) Right-angle (square) crossing
 - (9) Scouring and silting
 - (10) Straight stretch of river
 - (11) Velocity of flow
 - (12) Width of river
 - 1-10. Choice of bridge type
 - (1) Approaches
 - (2) Availability of funds
 - (3) Climatic conditions
 - (4) Economy in construction
 - (5) Foundations
 - (6) Navigational requirements
 - (7) Specialized firm
 - (8) Type of traffic
 - 1-11. Requirements of an Ideal Bridge
 - 1-12. Stages of investigation
 - (1) Reconnaissance or technical feasibility stage
 - (2) Preliminary or techno-economic feasibility stage
 - (3) Detailed survey and project report stage
 - 1-13. Preliminary and final project drawings
 - (1) Catchment area map
 - (2) Contour plan
 - (3) Cross-sections
 - (4) Index map
 - (5) Longitudinal section
 - (6) Soil profile
 - 1-14. Bridge Alignment
 - (1) Alignment on curve
 - (2) Control of highest flood level
 - (3) Effects of silting and scouring
 - (4) Layout of approaches
 - (5) River training works
 - (6) Skew bridges
 - 1-15. Traffic requirements of highway bridges
 - (1) Alignment
 - (2) Central verge
 - (3) Footpath
 - (4) Lighting
 - (5) Parapets and handrails
 - (6) Roadway width
 - (7) Safety kerbs
 - (8) Sight distance
 - 1-16. Length of a bridge
 - 1-17. Linear Waterway of a bridge
 - 1-18. Maximum flood discharge
 - 1-18-1. Direct method of calculating the maximum flood discharge
 - (1) Measurement of area
 - (2) Measurement of velocity of flow
 - 1-18-2. Indirect method of calculating the maximum flood discharge
 - (1) Rational method
 - (2) Use of empirical formulae
 - 1-19. Number of spans
 - (1) Alternative proposals
 - (2) Foundations for piers
 - (3) Odd number of spans
 - (4) Span
 - 1-20. I.R.C. Guide line code
- Questions 1

Chapter 2: FOUNDATION — 1 SPREAD AND PILE FOUNDATION

- 2-1. General
- 2-2. Essential requirements of a good foundation
 - (1) Location
 - (2) Stability
 - (3) Settlement
- 2-3. General principles of design of bridge foundations
 - (1) Bearing capacity of soil
 - (2) Frictional resistance
 - (3) Scour depth
- 2-4. Subsoil exploration
 - (1) Test pits
 - (2) Probing
 - (3) Auger boring
 - (4) Wash boring
 - (5) Test piles
 - (6) Deep boring
 - (7) Geophysical method

- 2-5. Testing of soil samples
 - (1) Plate bearing test
 - (2) Standard penetration test (SPT)
 - (3) Vane shear test
 - 2-6. Types of foundations
 - 2-7. Spread foundations
 - 2-8. Pile foundations
 - 2-9. Requirements for pile foundation
 - 2-10. Types of piles
 - 2-11. Load bearing piles
 - (1) Bearing piles
 - (2) Friction piles
 - 2-12. Materials used in construction of load bearing piles
 - 2-13. Cast-iron piles
 - (1) Advantages of cast-iron piles
 - (2) Disadvantages of cast-iron piles
 - 2-14. Cement concrete piles
 - 2-14-1. Cast-in-situ concrete piles
 - (1) Cased cast-in-situ concrete piles
 - (2) Uncased cast-in-situ concrete piles
 - 2-14-2. Pre-cast concrete piles
 - (1) General
 - (2) Casting of the pre-cast concrete piles
 - (3) Advantages and disadvantages of pre-cast concrete piles
 - (4) Underwater repairs of pre-cast concrete piles
 - 2-15. Sand piles
 - 2-16. Steel piles
 - (1) H-beam piles
 - (2) Box piles
 - (3) Tube piles
 - 2-17. Timber piles
 - 2-18. Wrought-iron piles
 - 2-19. Non-load bearing piles
 - (1) Concrete sheet piles
 - (2) Steel sheet piles
 - (3) Timber sheet piles
 - 2-20. Choice of type of pile
 - 2-21. Composite piles
 - 2-22. Screw piles
 - 2-23. Pulling of piles
 - (1) Use of double-acting steam hammers
 - (2) Use of pile extractors
 - (3) Use of tongs
 - (4) Use of vibrators
 - (5) Use of electricity
 - 2-24. Loads on piles
 - 2-25. Causes of failures of piles
- Questions 2

Chapter 3: FOUNDATIONS — 2 CAISSONS AND COFFERDAMS

- 3-1. General
- 3-2. Uses of caissons
- 3-3. Cofferdam and caisson
- 3-4. Materials used for the construction of caissons
 - (1) Cast-iron
 - (2) Reinforced cement concrete
 - (3) Steel
 - (4) Timber
- 3-5. Classification of caissons
- 3-6. Box caissons
 - (1) Construction of a box caisson
 - (2) Conditions favourable for the construction of a box caisson
 - (3) Points to be noted in case of a box caisson
- 3-7. Wells
 - (1) Single wells
 - (2) Multiple wells or monoliths
 - (3) Cylinders
- 3-8. Pneumatic caissons
- 3-9. Construction of a pneumatic caisson
- 3-10. Pneumatic caisson sickness
 - (1) Cause of caisson sickness
 - (2) Precautions to be taken to avoid caisson sickness
- 3-11. Drilled caissons
 - (1) Bell
 - (2) Shaft
 - (3) Cap
- 3-12. Methods of construction of drilled caisson
 - (1) Hand excavation method
 - (2) Machine drilled caisson
- 3-13. Precautions during construction of drilled caisson
- 3-14. Loads on caisson
 - (1) Vertical loads
 - (2) Lateral loads
 - (3) Sinking loads
- 3-15. Floating of caissons
 - (1) Construction of dry dock
 - (2) Floating from bank
 - (3) Turning of caissons
 - (4) Use of compressed air

- 3-16. Cutting edges
 - (1) Cutting edges with sharp ends
 - (2) Cutting edges with blunt ends
- 3-17. Factors affecting the choice of a cutting edge
- 3-18. Skin friction
- 3-19. Sand blowing
- 3-20. Methods to facilitate the sinking of caissons
 - (1) Air and water jets (3) Loading
 - (2) Blasting (4) Sand island
- 3-21. Tilting of caissons
- 3-22. General
- 3-23. Uses of cofferdams
- 3-24. Types of cofferdams
 - (1) Dikes (5) Rock-filled crib cofferdams
 - (2) Single wall cofferdams
 - (3) Double wall cofferdams
 - (6) Concrete cofferdams
 - (4) Cellular cofferdams (7) Suspended cofferdams
- 3-25. Prevention of leakage in cofferdams
- 3-26. Puddle for cofferdam
- 3-27. Factors affecting design of a cofferdam
- Questions 3

Chapter 4: SUB-STRUCTURES

- 4-1. General
- 4-2. Abutments
 - (1) Definition (5) Conditions of stability
 - (2) Functions (6) Dimensions
 - (3) Types (4) Forces acting on an abutment
- 4-3. Piers
 - (1) Definition (2) Function (3) Types
 - (4) Forces acting on a pier (5) Conditions of stability
 - (6) Dimensions (7) Location (8) Abutment pier
- 4-4. Wing walls
 - (1) Definition (2) Functions (3) Types
 - (4) Forces acting on a wing wall (5) Conditions of stability
 - (6) Dimensions (7) Precautions
- 4-5. Setting out for piers and abutments
 - (1) Bench marks
 - (2) Positions of reference points
 - (3) Principal reference lines
 - (4) Replacing original points
- 4-6. Materials for sub-structures
 - (1) Cement concrete (2) Masonry (3) Steel
- 4-7. Bridge Inspection
- Questions 4

Chapter 5: FIXED-SPAN SUPER-STRUCTURES

- 5-1. General
- 5-2. Simple bridges or beam bridges
 - (1) Deck bridges (2) Through bridges (3) Semi-through bridges
- 5-3. Continuous bridges
 - (1) Facilities for erection (2) Hard soil
- 5-4. Cantilever bridges
- 5-5. Arch bridges
 - (1) General
 - (2) Classification of bridge arches
 - (3) Advantages of arch bridges
 - (4) Disadvantages of arch bridges
- 5-6. Bow-string girder type bridges
 - (1) R.C.C. bow-string girder bridge
 - (2) Steel bow-string girder bridge
- 5-7. Rigid frame bridges
 - (1) R.C.C. portal frame (2) Steel portal frame
- 5-8. Suspension bridges
 - (1) General (2) Classification of suspension bridges
 - (3) Types of suspension bridges
 - (4) Advantages and disadvantages of suspension bridges
- 5-9. Cable-stayed bridges
- 5-10. Role of cable sheath in cable stayed bridge
- 5-11. Materials for super-structures
 - (1) Cement concrete (2) Masonry (3) Steel (4) Timber
- 5-12. Composite bridges
- Questions 5

Chapter 6: LOW COST BRIDGES: MOVABLE-SPAN SUPER-STRUCTURES

- 6-1. Low cost bridges
- 6-2. Movable-span super-structures
- 6-3. Bascule bridges
- 6-4. Cut-boat bridges
- 6-5. Flying bridges
- 6-6. Lift bridges
 - (1) Number of towers (2) Construction
 - (3) Overhead trusses (4) Span (5) Wind pressure
- 6-7. Swing bridges
 - (1) Flooring (2) Locking arrangements (3) Position of pier
- 6-8. Transporter bridges
- 6-9. Traversing bridges
- Questions 6

Chapter 7: LOW COST BRIDGES: CULVERTS AND CAUSEWAYS

- 7-1. Definition
- 7-2. Waterway of a culvert
 - (1) For catchment area upto 40 hectares
 - (2) For catchment area from 40 to 280 hectares
- 7-3. Types of culverts
 - (1) Arch culverts (2) Box culverts (3) Pipe culverts
 - (4) Slab culverts (5) Scuppers
- 7-4. Causeways
 - (1) Definition (4) Conditions to be satisfied
 - (2) Types (5) Data to be collected
 - (3) Necessity (6) Design of H.L.C.
- Questions 7

Chapter 8: LOW COST BRIDGES: TIMBER OR TEMPORARY BRIDGES

- 8-1. Definition
- 8-2. Materials used
- 8-3. Fastenings used
- 8-4. Types of timber or temporary bridges
- 8-5. Bridges with intermediate supports
 - (1) Crates (2) Cribs (3) Pile bents (4) Trestles
- 8-6. Bridges without intermediate supports
 - (1) Cantilevers (2) Suspension bridges (3) Trusses
- 8-7. Floating bridges
 - (1) Boat bridges (2) Pontoon bridges (3) Raft bridges
- Questions 8

Chapter 9: FLOORING

- 9-1. General
- 9-2. Factors affecting the choice of Flooring material
- 9-3. Requirements of a good flooring material
- 9-4. Types of floors
 - (1) Open floors (2) Solid floors
- 9-5. Flooring materials
 - (1) Jack arch (4) Mild steel troughs
 - (2) Mild steel buckle (5) Reinforced cement concrete plates
 - (3) Mild steel plates (6) Timber
- 9-6. Drainage of floors
- Questions 9

Chapter 10: LOADING ON BRIDGES

- 10-1. General
- 10-2. Buoyancy pressure
- 10-3. Centrifugal forces
 - (1) Road bridges (2) Railway bridges
- 10-4. Dead load
 - (1) Unwin's formula
 - (2) American formula for plate girders
 - (3) American formula for trusses
 - (4) R.C.C. arches
 - (5) R.C.C. slab bridges upto m span
 - (6) R.C.C. slab and T beam bridges
- 10-5. Deformation stresses
- 10-6. Earth pressure
- 10-7. Erection stresses

BRIDGE ENGINEERING
DETAILED CONTENTS

- 10-8. Impact load
 - (1) For road bridges
 - (2) For railway bridges
- 10-9. Live load
 - (1) For road bridges
 - (2) For railway bridges
- 10-10. Longitudinal forces
 - (1) For road bridges
 - (2) For railway bridges
- 10-11. Secondary stresses
- 10-12. Seismic load
- 10-13. Temperature variation forces
 - (1) Concrete structures
 - (2) Metal structures
 - (3) Temperature variation
- 10-14. Water pressure
- 10-15. Wind load
 - (1) For road bridges
 - (2) For railway bridges
- 10-16. Design of bridge foundations
- 10-17. Forces acting on different components of a bridge
 - (1) Forces acting on foundation
 - (2) Forces acting on abutments
 - (3) Forces acting on piers
 - (4) Forces acting on wing walls
 - (5) Forces acting on super-structures
- Questions 10

Chapter 11: BEARINGS

- 11-1. Definition
- 11-2. Purposes of bearings
- 11-3. Importance of bearings
- 11-4. Free and fixed bearings
- 11-5. Types of bearings
 - (1) Cement mortar pad
 - (2) Expansion bearing
 - (3) Knuckle bearing
 - (4) Rocker and roller bearing
 - (5) Rocker bearing
 - (6) Rubber bearing
 - (7) Neoprene bearing pads
 - (8) Sliding bearing
 - (9) Sole plate on curved bed plate bearing
 - (10) Tar paper bearing
 - (11) Pin bearing
 - (12) Pot bearing
 - (13) Laminated elastomeric bearing
- 11-6. Materials for bearings
- 11-7. Bed blocks
- 11-8. Maintenance of bearings
- Questions 11

Chapter 12: CONSTRUCTION AND ERECTION METHODS OF BRIDGE SUPER-STRUCTURE

- 12-1. General
 - (1) Centering
 - (2) Field forces
 - (3) Machinery
 - (4) Measurement of span
 - (5) Selection of method
- 12-2. Erection of steel girders
 - (1) Building out from supports
 - (2) Floating
 - (3) Lifting
 - (4) Rolling
 - (5) Staging
- 12-3. Erection of steel truss bridges
 - (1) First stage
 - (2) Second stage
 - (3) Third stage
 - (4) Fourth stage
- 12-4. Erection of suspension bridges
 - (1) Erection of towers
 - (2) Erection of suspenders
 - (3) Erection of catwalks
 - (4) Erection of stiffening trusses
 - (5) Erection of flooring system
- 12-5. Construction of pre-stressed concrete super-structure
- 12-6. Erection of R.C.C. and pre-stressed girder bridges
 - (1) Cast-in-situ construction on staging
 - (2) Segmental cantilever construction using cast-in-situ or precast segments
 - (3) Span by span method
 - (4) Incremental launching method
 - (5) Movable form system or movable scaffold system
- 12-7. Formwork for arch bridges
 - (1) Good features
 - (2) Types
- Questions 12

Chapter 13: MAINTENANCE OF THE BRIDGES

- 13-1. General
- 13-2. Deterioration of bridges
- 13-3. Bridge Failures
- 13-4. Defects of bridges and their rectification
 - (1) Cracks in concrete
 - (2) Corrosion of structural steel work
 - (3) Other defects of bridge
- 13-5. Inspection of bridges
 - (1) Detailed inspection
 - (2) Routine inspection
- 13-6. Posting of bridges
 - (1) Load limit postings
 - (2) Speed postings
- 13-7. Rating of existing bridges
 - (1) Magnetic particle detector
 - (2) Radiographic equipment
 - (3) Ultrasonic testing equipment
- 13-8. Rebuilding of bridges
 - (1) Damage
 - (2) Excessive maintenance cost
 - (3) Obsolescence
 - (4) Weathering
- 13-9. Testing and strengthening of bridges
 - (1) Correlation method
 - (2) Load testing
 - (3) Theoretical method
- 13-10. Maintenance of the bridges
- Questions 13

Chapter 14: MISCELLANEOUS TOPICS

- 14-1. General
- 14-2. Afflux
 - (1) Definition
 - (2) Importance
 - (3) Height of afflux
- 14-3. Approaches of bridge
 - (1) Borrow pits
 - (2) Construction
 - (3) Cost
 - (4) Curvature
 - (5) Extension of bridge
 - (6) Gradient
 - (7) Joint walls
 - (8) Maintenance
 - (9) Width and length
- 14-4. Bridge architecture
 - (1) Construction
 - (2) General design
 - (3) Landscaping
 - (4) Light and shade
 - (5) Lines and edges
 - (6) Proportioning
 - (7) Railings
 - (8) Simplicity
- 14-5. Clearance and freeboard
 - (1) Definition
 - (2) Necessity
 - (3) Provisions
- 14-6. Combined road and railway bridges
 - (1) Airlock equipment
 - (2) Alignment
 - (3) Foundations
 - (4) High tensile steel
 - (5) Lighting on road
 - (6) Section
 - (7) Super-structure
 - (8) Total length
- 14-7. Double-decker bridge
- 14-8. Economic span of the bridge
 - (1) Definition
 - (2) Assumptions
 - (3) Exceptions
- 14-9. Grip Length
- 14-10. Handrails
 - (1) Panel slab and post system
 - (2) Post and rail system
- 14-11. Joints of bridge
 - (1) Construction joints
 - (2) Expansion and contraction joints
- 14-12. Maximum flood discharge or High flood level (H.F.L.)
- 14-13. River Training works
 - (1) Objects
 - (2) Methods
- Questions 14

Appendix : SOME MARVELLOUS BRIDGES

- A-1. Bandra Worli Sea Link (Rajiv Gandhi Setu) – Mumbai, India
 - A-1-1. Planning
 - A-1-2. The amazing facts behind Bandra-Worli Sea Link
 - A-1-3. Benefits of the project
 - A-1-4. Criticism of the project
- A-2. Golden Gate Bridge – San Francisco, U.S.A.
 - A-2-1. The amazing facts behind Golden Gate Bridge
- A-3. Tower Bridge – London, U.K.
- A-4. Sundial bridge – California, U.S.A.
- A-5. Zhangjiajie grand canyon glass bridge – China
